Sustainability Competition: Industry, Innovation & Infrastructure

Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialization, and foster innovation.

Introducing FlaminGo Swift: Your all-in-one solution for revolutionizing transportation. Our app combines car sharing and delivery services, leveraging volunteer drivers to align with global goals for industry, infrastructure, and innovation. We optimize vehicle usage, reduce traffic congestion, promote sustainability, and engage communities for a more efficient and socially responsible transport ecosystem. Join us in shaping the future of mobility.

Design Thinking

Goal Statements

- Development of an app that promotes car sharing and alleviates infrastructure strain.
- Creation of new avenues for efficient goods shipment.
- Integration of innovative delivery options and establishment of a reliable delivery partner network.
- Revolutionizing the logistics industry by leveraging vehicle idle time for goods transportation.
- Enhancement of delivery efficiency and environmental friendliness.
- Provision of a seamless, secure, and cost-effective delivery experience for businesses and individuals.
- Establishment of the app as a leading platform for innovative shipping solutions.
- Contribution to improving supply chain efficiency and reducing traffic congestion.

Problem Statements

- Combining car sharing and goods shipment within a single app.
- Solution for the effective utilization of vehicles for goods transportation.
- Efficient connection of vehicle idle times and shipping needs of businesses and individuals.
- Reduction of empty trips and maximization of vehicle utilization.
- Creation of new revenue streams for vehicle owners and delivery partners.
- Optimization of the supply chain through faster and more cost-effective goods shipment.
- Reduction of traffic congestion and environmental impacts through more efficient logistics solutions.
- Attractive offering for businesses and individuals to handle deliveries affordably and conveniently.
- Potential to improve urban

Hypotheses

- Integration of passenger and goods transport on a single platform.
- Avoidance of empty trips and maximization of vehicle utilization.
- More efficient resource utilization and reduction of transportation costs.
- Expansion of user diversity by catering to individuals and businesses.
- Attractive opportunity for transport providers to offer more versatile services.
- Additional revenue streams for transport providers and potentially cheaper ridesharing options for individuals.
- Increased potential for bookings and a larger user base.
- Enhancement of platform success through expanded features and targeted audience engagement.
- Need for further investigation, market analysis, and actual

mobility and alleviate infrastructure strain.

Persona Group

- **Commuters:**
  Individuals undertaking regular, long-distance journeys to universities or workplaces, seeking optimization of their commuting times.
- **Students:**
  Seeking cost-effective and efficient transportation options, especially when residing in remote regions.
- **Tourists:**
  Travelers looking to explore cities or regions on a budget while also seeking opportunities to engage with locals for a more authentic experience.

Persona

Nils Nilsson

1. Nils is a busy entrepreneur and frequent traveler who is in search of an app to quickly and affordably send packages via car sharing.
2. Additionally, he wants to find ridesharing opportunities to make his travels more flexible and cost-effective.
3. Safety is a top priority for Nils, so he requires an app with reliable drivers and transparent ratings.
4. User-friendly booking and handling of both packages and ridesharing arrangements are crucial for Nils.
5. He is environmentally conscious and seeks a sustainable transportation option to contribute to emission reduction efforts.

Book a ride

Planning a trip? Option for carpooling! Discover affordable shared rides and travel alongside like-minded individuals heading in your direction.

a story about all features

Onboarding is crucial, providing users with a vital introduction to your application and its features, establishing trust by demonstrating user-friendliness and reliability. It aims to minimize frustration, making the learning curve smoother, and goes beyond teaching, encouraging user engagement by showcasing the app's value. Tailoring the onboarding process to individual preferences enhances the user experience, showing understanding of user goals and increasing the likelihood of continued app usage.
